

Living the Field of the Infinite

We are being invited to define a new culture by choosing to live at the most distant horizon we can glimpse and even beyond. We are moving from personal to Universal to Cosmic Possibility.

This will be an opportunity to share in the awakening, remembering and cultivating of ancient heart practices. We will utilize cutting-edge science mindfully so that we can offer illumined ways to integrate our personal lives and truly make a difference in the world.

Points of Collective Focus for the Weekend:

- *Heart-Centered Living: Emotions, sensations, feelings: tools to creative expression and brain plasticity.*
- *The Resonance of Wholeness and the Field of Synthesis: Interdependence arising from the essential Oneness in absolute and exquisite diversity.*
- *Non-dual Awareness: Emptiness as the state of complete acceptance.*
- *Intuition, Telepathy and Directed Intention: Co-creation as a magnetic response*
- *Angelic, Dakini, Solar Angels: Subtle Energy and Information of Divine Beings*

Each of us has a place of residence or ground of being with which we align to initiate our worldview. It acts much like a lens through which we view every impulse that we encounter, thus shifting our perspective to the heart-centered wisdom and deeper knowing that is in the Universal Field. We then align with all that is possible, and can become agents embodying that intention.
