

## Living the Mysteries: *Science meets the intuitive, meditative, and secret ancient wisdom teachings*

We are all spiritual, biochemical, energetic and informational beings that are here to bring a more enlightened perspective to the transformation of both ourselves and the planet as a whole. The current culture of conflict ultimately reflects the lack of inner peace, harmony and compassion in our own nature.

### **Over the weekend we will:**

- *Identify and encourage exploration of personal strengths, innate knowing and intuitive insights to transcend the limited context of how we know ourselves 'to be,' so that we can live fully 'that which we came to do.'*
- *Practice maximizing our relationship with the quickening global changes so we can experience greater states of joy, peace, equanimity, kindness, creativity and focused awareness.*
- *Understand more fully our roles and opportunities in dynamic change processes by exploring the ways we can support one another.*
- *Seek to find a place of inner calm in order to bridge internal and external states of awareness, and skillfully self-manage our inner and outer states of consciousness.*

Futurists see the feasibility of possible human evolution that will result in a more inclusive orientation. The emerging Global community will manifest greater political, social and economic alignment, and be more ecologically sustainable.

By opening to subtle energy technologies, more expansive and inclusive worldviews and the recognition that we are all part of a greater whole, we can fundamentally change our planetary future.
